4. The limitations recited in independent **Claim 13**:

"...a second storage unit configured to store regulation information to regulate the data communication requested by the communication request the regulation information including the application identifier indicative of the application program stored in association with a second identifier indicative of an original source of the application program, the regulation information also including a traffic threshold; and

a second processing unit configured to receive the communication request from the communication terminal, wherein the second processing unit is further configured to relay the data communication in accordance with the regulation information stored in the second storage unit, and the second processing unit is further configured to decrease an amount of data in the relayed data communication in response to the communication request satisfying a first condition and a second predetermined condition, the first condition being that traffic in the network is heavier than the traffic threshold included in the regulation information stored in the second storage unit, and the second predetermined condition comprising the download source indicated in the first identifier received in the communication request being identical to the original source indicated in the second identifier included in the regulation information."

5. The limitations recited in independent **Claim 20**:

"...the stored regulation information including a traffic threshold and the application identifier indicative of the application program stored in association

with a second identifier indicative of a predetermined original provider of the application program; and

a processing unit configured to receive the communication request from the communication terminal and confirm a first condition and a second condition are satisfied, the first condition being that a level of traffic through the relay device exceeds the traffic threshold, and the second condition comprising the download source indicated with the first identifier received in the communication request being identical to the predetermined original provider indicated with the second identifier included in the stored regulation information; and

the processing unit further configured, in response to the communication request satisfying the first condition and the second condition, to invoke a guideline for the data communication between the communication terminal and the server and relay the data communication in accordance with the regulation information stored in the first storage unit."

6. The limitations recited in independent Claim 27:

"...confirming with the relay device that a first condition and a second condition are satisfied, the first condition being that traffic in the network is heavier than the traffic threshold included in the stored regulation information, and the second condition comprising the download source indicated with the first identifier received in the communication request being identical to the original provider indicated with the second identifier included in the stored regulation information; and

invoking a constraint of the data communication between the communication terminal and the server with the relay device, if the communication request satisfies the first condition and the second condition, a predetermined condition, the predetermined condition comprising the download source indicated with the first the constraint of the data communication invoked by the relay device in accordance with the regulation information stored in the second storage unit."

7. When taken in context the claims as a whole was/were not uncovered in the prior art i.e., the dependent claims are allowed as they depend upon an allowable independent claim.

8. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
